

To raise right side of tank for circulation pump access:

Tools needed: T20 Torx screwdriver and pliers.

1. Remove one T-20 Torx screw from both rear corners holding tank to base (1) -- removing screw from both sides allows tank to be blocked upward.
2. Remove right toe kick bracket by removing T-20 Torx screw (2).
3. Remove T-20 Torx screws from front right bottom corner holding tank to base (3).
4. Remove right hinge cover (4a), release right door tension cord from hinge (4b) & remove ground wire (4c).
5. Raise and block up tank as shown with strut onto base (5a), sliding a piece of wood or other solid material between the tank and base to keep tank from falling back onto base (5b).

CAUTION: Don't turn dishwashers upside-down for tank access. When dishwashers are turned upside-down, water can flow into the water fill assembly diaphragm and cause water to not fill properly.
